Plus the story of the new Microsoft Office design. This web-based animation animation is directed by a variety of talented artists from around the world. We have realized that we could also put our creativity to work. What if we could apply some of the concepts we have learned from the design market and try to make an animation that can use innovative technologies like the HTML5, JS, and CSS3 with the hybrid of the Adobe Flash? How great it is if we can create something unique that can capture attention even as a simple web animation? Our goal is to make a unique and new style animation that is played with html5 technologies. In our quest to create a dynamic and fluid web animation we involved the most talented artists from around the world. We have teamed up with some of the top creative minds like Eric Imrie, Mark D. Guillemette, Wai Thong "Sammy", and Auregins Rodriguez. Microsoft Ecosystem has been released as a complete work ready to be used on websites and blogs as well as social networks. The animation can be downloaded, re-sized and re-arranged to give you an entirely new set of animation. Please use our templates for a clean and professional preview of Microsoft Ecosystem. If you have a website, blog, or social network, please do not hesitate to request a customized Microsoft Ecosystem, which can be modified on your own website or social media network. All of the After Effects files are 100% ready to be used. Please download the project file from our website and setup your own AE project accordingly. If you have any questions regarding the project, please feel free to contact us. We are extremely grateful for all of the interest in our work. We hope that you enjoy our work. [10]{ } ,, ().
